### **Refreshments Included**

(Please note for booking more than 1 course or more than 1 person attending the same course from the same school, discounts are available)

Getting to Know SMART: Latest Software and Hardware Basics is the perfect training course for teachers who are new to using SMART products (hardware and/or software) and for teachers who feel they need to refresh their existing SMART knowledge and skills.

The course content will include an overview of board features, how to implement key board features into teaching, troubleshooting tips, exploring SMART Ink by having an overview of the tool bar and side bar.

To compliment this training and to further develop your knowledge, upon completion of this course, we will be able to recommend follow up training on-line that you will be able to access. Once completed a certification from SMART will be received.

To extend your training opportunities further, upon completion of this course, you will be eligible for a place on Course 2 - Building a SMART lesson for Classroom Teachers: KS1 and KS2 (further cost is involved).

When booking onto the course please indicate which board type you currently use. This will help us to tailor the training further for your particular needs.

Pheasey Park Farm Primary School is one of only a few recognised Smart Exemplary Schools in the UK. As part of the training we will visit Europe's first collaborate classroom. You will watch live lessons that are enhanced in quality through the use of SMART technologies and trained staff.

To book a place please complete and return the attached booking form.
