Thursday 13<sup>th</sup> June, 9:30 am - 4:00 pm

Light Lunch and Refreshments Included

(Please note for booking more than 1 course or more than 1 person attending the same course from the same school, discounts are available)

Building a SMART lesson for Classroom Teacher: KS1 and KS2 is designed for teachers who are familiar with SMART boards and want to increase pupil engagement and interaction through the use of the latest features of SMART Notebook software.

The course content will include a recap on board features (exploring those not covered during course 1), exploring the pedagogical use how/why/when to use SMART Lab features (not including device connections), learning how to implement technologies further into the classroom through the introduction of SMART digital wrappers. There is also a content creation task that will be fulfilled by all delegates during the training day – this will provide a resource base of digital wrappers that each teacher will be able to take away with them to use in their own teaching.

Please note there is a pre-training course that must be completed online prior to attending this course. Details will be shared once booking has been completed. Post training delegates will have the opportunity to take their learning further by accessing additional online skills training provided by SMART. To further extend your training opportunities, upon completion of this course, you will be eligible for a place on course 3: Creating a SMART Collaborative Classroom (further cost is involved).

Pheasey Park Farm Primary School is one of only a few recognised Smart Exemplary Schools in the UK. We will include a visit to several classrooms in our school during the training enabling you to see the full use of digital wrappers implemented across the school as well as being able to observe live lessons that are enhanced in quality through the use of SMART technologies and trained staff.

To book a place please complete and return the attached booking form.
